Therapik

Therapik is a small, portable hand-held device that provides pain and itching relief from bites and stings of mosquitoes, bees, wasps, hornets, black flies, ants, fleas, ticks, chiggers and even jellyfish and stinging nettle. This unique FDA-approved treatment device soothes pain and itching and is safe for both adults and children. Most insect venom is thermolabile, or sensitive to heat. Therapik's patented technology delivers heat in the precise temperature range necessary to deactivate the venom. As the heat neutralizes the venom and increases blood flow to the affected area, there is a marked reduction in swelling, redness, pain and itching. \$12.95; www.therapik.com

Samsung Exhibit 4G

Budget-friendly and feature-rich, the Android-powered Samsung Exhibit II 4G keeps you connected to the T-Mobile network. The Exhibit II combines a 1 GHz processor and T-Mobile's 4G network. Capture on-the-go photos and videos with the 3-megapixel camera (with DVD-quality video capture). Additionally, the Exhibit II is outfitted with a front-facing VGA camera for composing self portraits for social networks as well as video chats over 4G or Wi-Fi. \$249; www.samsung.com
